

## TOOLS FOR REVIEWING FRAMEWORKS

**The MGI:** This tool is for national level actors. If a Migration Governance Indicators (MGI) assessment has taken place for the country, policymakers can use this tool to strengthen policy coherence across migration governance domains. As the framework is based on policy inputs, the assessment can help governments diagnose where there may be gaps in the way they formulate their national migration governance.

**Policy coherence indicator tools:** Tools have been developed that use specialized indicators as a diagnostic tool for policy coherence. For example, the UN Joint Migration and Development Initiative's *Guidelines on Mainstreaming Migration into Local Development Planning* can be used as a tool for governments to identify institutional, policy and intervention gaps or weaknesses in their migration governance. Indicators are offered across issues such as migrant rights, inclusive education, inclusive employment, inclusive health care that focus on the processes and structures needed to promote policy coherence. These indicators have accompanying questions that practitioners can answer to identify any specific incoherence, helping them design ways to amend them. This tool is tailored to the 2030 Agenda; indicators are linked to SDG targets and implementing bodies can consult the ones they wish to focus on depending on the targets they have prioritized. Although the tool is designed for subnational-level actors, national actors may also use this by adapting indicator questions slightly.

**United Nations Development Programme's Rapid Integrated Assessment (RIA):** Where a wider mainstreaming exercise is taking place, RIA can be used to help review readiness regarding SDG implementation in certain areas. Specifically, it can help actors map out existing relevant migration and development frameworks, with a view to identifying gaps that new interventions can help address.
