

Part one: Migration Context Discussion

To discuss which migration and development topics are most important to the local/national context. Discussion questions may include:

- What are key migration and development issues to tackle locally/nationally and why? How do these issues relate to migration and development issues at the local/national (or other) level?
- What are key challenges related to migration and development locally/nationally?
- What are key opportunities related to migration and development locally/nationally?
- What are possible emerging issues for migration and development in the time up to 2030 locally/nationally? What major issues could arise in the next five years? What about the five years after that? How do these issues relate to migration and development issues at the local/national (or other) level?

Part two: Prioritization Discussion

To discuss which agreed number of SDG targets to prioritize, based on the previous discussion. Consultation participants can discuss and choose targets from all possible ones. This approach could be taken if more than one session is planned, as it may be complex to undertake in one session. Given there is such a wide range of migration-related Goals and targets, to streamline the process participants could be given a shortlist of targets to discuss in sessions, pre-selected by the implementing body. Alternatively, implementing bodies could ask participants to provide written inputs on proposed targets before the sessions for discussion. This could be useful when engaging with civil society organizations. Each organization could be asked to submit one written input on which targets they think are most important.

Discussion questions for each target may include:

- Why should this be prioritized?
- How is this applicable to local/national migration and development issues?
- What migration and development sub-issues for local/national attention are under this?
- If target 10.7 is considered, which areas are the most important to address locally/nationally?
 - Institutional capacity
 - Migrant rights
 - Safe and orderly migration
 - Labour migration management
 - Regional and international cooperation and other partnerships
- How might migration and development issues relating to this target change before 2030 locally/nationally?
- What are the main challenges in addressing this locally/nationally?
- What extra resources are needed to address this locally/nationally?
- How does this target link to local/national/other relevant development plans?
- Are there any local or national migration and development issues that should be addressed, that are not reflected in the chosen targets? What could be ways to include them?
